

Report on the Variations of the Magnetic Intensity Observed at Different Points of the Earths Surface

Report on the Variations of the Magnetic Intensity Observed at Different Points of the Earths Surface by Major Edward Sabine. General Sir Edward Sabine KCB FRS (14 October 1788 26 June 1883) was an Irish astronomer, geophysicist, ornithologist, explorer, soldier and the 30th President of the Royal Society. This book is a reproduction of the original book published in 1838 and may have some imperfections such as marks or hand-written notes.
