Satellites have been

launched from various vehicles, including those launched by American, Russian and European rockets, as well as those launched indigenously by India. The organisation responsible for India's satellite program is the Indian Space Research Organisation (ISRO). The Union of Concerned Scientists, as of the beginning of 2016 there are 1381 active satellites orbiting the Earth, and the United States Space Administration (NASA) has over 100 active satellites.
