

## Sovremennaya biogeokhimicheskaya situatsiya regiona Nizhney Volgi: Sovremennyy biogeokhimicheskyy rezhim regiona Nizhney Volgi i ego vliyanie na ... pokazateli krovi zhyvotnykh (Russian Edition)

V monografii predstavleny materialy biogeokhimicheskoy obstanovki, slozhivsheysya v nastoyashchee vremya v regione Nizhney Volgi. Izucheny nazemnye i vodnye ekosistemy, v t.ch. i dinamika mikroelementov v pochvakh, nazemnykh rasteniyakh, kormakh zhyvotnykh, gruntakh, v vode, plankton, bentose, makrofitakh i organakh i tkanyakh osetrovnykh, okunevykh i karpovykh ryb. Opredelen nizkiy uroven selena i kobalta v nazemnykh ekosistemakh i kormakh selkhozzhivotnykh. V rabote pokazana fiziologicheskaya kartina obmena mikroelementov i gematologicheskaya kharakteristika proizvoditeley tsennykh vidov ryb. Issledovana vliyaniem ekologicheskikh faktorov na fiziologo-biokhimicheskie parametry rastitelnoyadnykh ryb. Monografiya mozhet byt polezna nauchnym rabotnikam i praktikuyushchim vetvracham pri profilaktike i korrektsii kombinirovannykh gipoelementozov, a tak zhe ispolzovana v kachestve uchebnogo posobiya po kursam gidrobiologii, fiziologii selkhozzhivotnykh, ekologii dlya studentov, aspirantov i prepodavateley spetsialnosti veterinariya, zootekhnika, ekologiya i vodnye resursy i akvakultura universitetov.
