

Advances in Planning and Management of Watersheds and Wetlands in Eastern and Southern Africa (Environmental round table series)

Sustainable development of water resources is a key to the maintenance of the natural eco-system which supports the wellbeing of human populations. This collection of papers provides an ecosystems approach to watershed and wetlands planning and management. The volume is one of five of the output of the Environmental Capacity Enhancement Project - a four year project involving participants from thirteen African countries. It assesses the eco-systems approach, tools for implementation, case studies of opportunities for development and assessments of threats to sustainable water resources development in Eastern and Southern Africa.
