

# Notes of a Botanist on the Amazon & Andes; Being Records of Travel on the Amazon and Its Tributaries, the Trombetas, Rio Negro, Uaupes, Casiquiari, Pa

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition. Excerpt: ...in the morning, when the trees had mostly acquired their new foliage, some of fine pale green, others of pink or red (here, where all is evergreen, there are no autumnal tints like those of the temperate zone), standing out from deep dark recesses, occasionally varied by the finely divided tremulous foliage of a graceful Acacia and the large white star-like leaves of a Cecropia, while here and there hang festoons of some purpleflowered Bignoniacea, white-or red-flowered climbing Polygaleas often exhaling a most delicious odour, while lower shrubs, which barely stand out of the water, are bedecked with countless flowers of various Convolvulaceae, chiefly of a species of Batatas, mixed here and there with two or three Phaseolae, some yellow-, others purple-flowered--in the glare of the midday all this seems comparatively tame: the eye is fatigued with looking steadfastly at anything--even green seems dazzling--light penetrates everywhere, and the eye searches in vain for the variety of shady recesses which are at other times so pleasing.... It is only in the height of the rainy season that the margins of these rivers are seen to advantage--then all is fair and pure. But let the water descend 20 feet, and there appear discoloured trunks, shaggy towards their base with black rootlets, muddy and tangled stems of shrubs which, though not normally twining, seem to have interlaced for mutual support against the crushing, sweeping water. Herbaceous twiners all dead and presenting only withered, blackened strings. Bunches of dead grass and other unsightly matter brought down by the stream hang everywhere. Yet it is in the dry season that most of the forest trees are

in flower. The visit to Manaquiry, about fifty miles up the Solimoes, which...
