

## Pharmaceutical and Food Analysis: A Manual of Standard Methods for the Analysis, of Oils, Fats and Waxes, and Substances, in Which They Exist Together, With Allied Products (Classic Reprint)

Excerpt from Pharmaceutical and Food Analysis: A Manual of Standard Methods for the Analysis, of Oils, Fats and Waxes, and Substances, in Which They Exist Together, With Allied Products. Mr. Thurston's conception of a text book on chemistry to meet the needs of chemists engaged in the analysis of foods and drugs has appealed to me. His ideas of the incontrovertible data - the backing needed by chemists engaged in such analysis - were born of experience long and intensely practical. In this assemblage of data, which he built up around him, and with which he fortified himself in his work, I, an onlooker, find, at the close of his life of uprightness and usefulness, factors that contributed so highly to his success. The pages of this book contain the very essence of all that others know on the subjects treated. And to the knowledge of others Mr. Thurston has liberally contributed from his own. As a friend of the author I have had real pleasure in assisting the publishers in the final preparation of the pages. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com). This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
