

## Physiological Strategies in Avian Biology (Tertiary Level Biology)

Birds are adapted in many ways to their lifestyles and environments: for flight, migration, thermoregulation, osmoregulation, reproduction, resource utilization and (in some species) by domestication. Each of these broad areas has its own chapter in this excellent book. Birdwatchers ought to have at least one avian biology book on their shelf, and this highlyreadable one is recommended to those who cannot afford the larger, more expensive works that are available. (Robert Hudson, Nick Riddiford, Angus Hogg & Peter Lack. Reviews. Bird Study, Volume 34, Issue 2, 1987. Free access. DOI:10.1080/00063658709476956 Informa UK Limited, an Informa Group Company)
