

THE ROLES OF ENVIRONMENTAL HEALTH OFFICERS IN THE BUILDING OF A SUSTAINABLE AND HEALTHY ENVIRONMENT

Environmental Health Officers play a very great and major role in the environment. They are called the custodian or managers of the environment because of how vital and important their roles are in the environment. Without any iota of doubt, the absence of Environmental Health Officers in an environment will definitely bring about a downstream and a collapse to the environment of that area and as a result the environment becomes a great threat to man and his properties just as we are having it now. This research work deepens its study in the roles or impacts of Environmental Health Officers in the building of a healthy and sustainable Environment in the Abeokuta Metropolitan Area of Ogun State. The first chapter deals with the introductory aspect of the topic which include: background of the study, statement of problems, significance of the study, aims and objectives of the study and operational definition of terms. The relevant to the topic of some authors were reviewed in chapter two to provide a theoretical framework of the project. Chapter three discussed the method used in collecting data i.e. research methodology with the use of questionnaire, oral interview and observation. In chapter four, the presentation of data analysis was carried out at the end, the project recommendations were given for the appropriate authority based on the findings. Chapter five gives a discussion of the findings gotten from the analysis in chapter four and uses it as a yardstick for recommending possible solutions to effectualizing the building of a sustainable environment. key words: land pollution, waste treatment, environmental chemistry, waste management, Hazardous Waste, pollution and waste, waste disposal, Research Topic, Science Experiments, Research Paper, Biochemistry, chemistry, science fair projects, science projects, sustainable environment, healthy
