

Proceedings: Twenty-Fourth Gulf of Mexico Information Transfer Meeting

In meeting its mission to manage energy and minerals resources on the Outer Continental Shelf (OCS), the Minerals Management Service (MMS) administers an Environmental Studies Program (ESP) to gather and synthesize environmental and social and economic science information to support decision making concerning the offshore oil and gas program. The Outer Continental Shelf Lands Act established policy for the management of the OCS natural gas and oil leasing program and for the protection of marine and coastal environments.
