Not illustrated. 1865 edition. Excerpt: ...districts, where the swarthy sons of the spade and the pickaxe not unfrequently extemporize their fishing-rod out of the nearest clothes-prop. In the length of her rod, however, the fair prioress was less ambitious than some of her modern disciples; Hofland, writing in our own century (1839) talks of a trolling-rod twenty feet long!--such a rod would certainly require a troller 10 feet high to wield it effectively. To show the crudity of some of the directions given by jwm-trolling authorities, the following may be quoted from The Fishing-rod and how to use it, by Glenfin, who professes to give the most approved instructions in the whole art. The best trolling-rods, he says, are made of stout bamboo, with a short whalebone top-piece... Almost any stoutly made rod may be converted into a trolling-rod by changing the top-piece The trolling-rod should have one ring on each joint, &c To practical fishermen, who are acquainted with the difficulty of keeping the spinning-line clear even with all British Anglers Manual, &c. the appliances of upright rings and plenty of them, and who know the absolute necessity of having a stiff, rather than a pliable top-joint for striking a fish, it is needless to point out the fallacy of these most approved instructions. It is hardly possible that the writer could have been even a tolerably promising disciple in the school of which he professes to be an apostle. We are not at all surprised, therefore, to find him immediately afterwards advocating a 16 or 18-foot rod of stout bamboo; all I would say to those who regard with an eye of favour such an unwieldy and exhaustive engine is--try it. Spin for 6 or 7 hours consecutively...
