

The Ontario High School Chemistry (Classic Reprint)

Excerpt from The Ontario High School Chemistry There are certain essential features that every elementary text-book in Chemistry should exhibit.(1) The chief function of science, as a part of school education, is not to impart information, but to offer a training in the scientific method by which the mind works up the concrete facts of nature into generalizations. Hence a text-book should show how investigations are conducted; and, for this purpose, the method by which the process of combustion and the composition of air and of water were discovered are presented with some detail.(2) An elementary text-book should also state some of the generalizations or laws of chemistry, as it is a knowledge of these that indicates clearly that chemistry is a science. Moreover, it is essential, in order that these laws should be properly understood, that a knowledge of important substances, their methods of preparation, and their properties should be stated, as it is only by means of such knowledge that the generalizations can be approached.(3) Side by side with the advance in the knowledge of the facts of chemistry has moved the development of chemical theories, and no adequate knowledge of the methods of chemistry could be presented without a statement of those theories that have had, and still possess, such potent influence on the advancement of the science. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of

imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
