

The Thinning of the Veil: A Record of Experience (Classic Reprint)

Excerpt from The Thinning of the Veil: A Record of Experience Empirical evidence that human personality survives the physical body through which it has manifested itself, and that communication is possible between persons discarnate and those still in the fleshy, has been gathered, sifted in some degree, and made accessible to the public, by Spiritualists, the Society for Psychical Research, and other investigators. In recent years such evidence has presented itself from many sides, in rapidly growing volume; and it now amounts, in the judgment of some eminent scientists, to ample proof. At any rate, no theory hitherto suggested short of the Spiritualist one, is reconcilable with all the relevant facts of well-authenticated experience.
